

I strongly oppose any changes to the current FCC indecency standards that would allow television and radio stations to broadcast expletives and nudity on the public airwaves, even if brief or "fleeting." I am afraid this would lead to gradually increasing profanity and nudity on broadcast television. The public airwaves should be free of this kind of material. You have been the only shield that we could count on for years so please don't give in now. Please, do not stop policing vulgar language and nudity on TV. Abusive language and nudity is illegal in public so why would you allow it on TV? ! ? ! ? Leave the nudity & the 'F' word to the movies.

Please help us keep our airways free of profanity such as the "F Word". We need to keep a ban on profane words. We want to encourage civility, manners, a higher standard of expression and respect towards others. We want people including the rising generation who are already exposed to enough garbage to look to a higher moral standard instead of low expectations of mere acceptance of outright filthy vocabulary. Don't we get enough profanity and obscenity already, in our workplaces, secondary schools, and even from politicians who make our laws? It's bad enough that we have to sift through any and every movie, trying to escape the meanness and vulgarity and sordidness. But at the end of the day, when we're worn out and want to unwind in front of the TV, we don't need to have that stuff shoved in our faces for another 8 hours. Don't loosen your standards against pornography and profanity!

We don't want nudity on our programs. There is too much worthless language and improper exposure of people's bodies on TV already. I strongly oppose any nudity or profanity on TV programs. Neither children nor adults need that! Is morality completely dead in our society?

Even with the current policy the language, sexually charged dialog and semi-nudity are so bad that if I had children at home I would not allow them to watch most of the current programs on Broadcast TV and have quit watching most of them myself! Many broadcasts are already beyond peoples' standards of decency. The decline of a culture or society starts slow and then builds up. Now, we are at the end of the social decline in America. Television bombards us with sexual content, sexual references and foul languages on almost every program. The censors can barely keep up. The moral element has been declining since the 1990's and now we see that the FCC is contemplating to fail American families once again.

Also, there is way too much violence and this should be brought to a halt before there are any more school rampages/killings. These kids see this stuff on tv all the time and why would they think it's not okay?

Have we lost all sense of decency in this country? Who is behind these outrageous initiatives? Are we to have our children staring at sex and naked couples on TV throwing the ?F-bomb? around if they innocently tune in after school? Every household has a TV today. We ban smoking in public

places because of the proven harmful effects of secondhand smoke. We suspend kindergartners from school for drawing a picture of a gun. Yet, in the most private spaces we have, our homes, you want to let the filth from Hollywood in? How dare you?!?!? Throw this proposal back in the sewer where it came from. We must protect our children from harm. Opening TV up to nudity opens the door for pornography to our children. If you listen to what men on death row say started them down the path that lead them to murder, pornography is cited as the beginning.

The FCC guidelines need to be tightened not removed. If anything they should be required to make their programs more in keeping with moral standards that are alright for our children to see. Our children DO NOT need to be exposed to more foul language and nudity. Don't do it !! Do not drop the regulations for profanity and nudity. Let the porn stay where it is. Don't invade our homes with more. THERE IS WAY TOO MUCH UNSUITABLE PROGRAMS FOR CHILDREN/TEENAGERS AS IT IS.

Our nation is already going to pot. We don't need another thing to bring it down! If you remove the ban this country's morals will go completely down the tube and they don't have far to go as it is.

Please keep some standards! Please reconsider removing the ban in place.

If I was head of the FCC, I would not be afraid of strict enforcement of FCC rules and regulations. Instead of caving to political pressure. Our last line of cultural stability is what is shot out over the airwaves. If we lose our moral compass, we lose this country.

Thank-you for your considerations
